

## Interns (m/f) Research

### **About us:**

With RTT only reaching its tenth birthday this year, we are still relatively young. However, we have grown quite a lot over the past ten years. We now have over 350 staff enjoying the day-to-day challenge of developing powerful images for customers such as Adidas, Toyota and Lamborghini. In addition to our headquarters in Munich, we have offices in Stuttgart, Hamburg, Brussels, Paris, Milan, Los Angeles, Detroit, Seoul, Shanghai and Tokyo. But we're not going to stop there. After all, we are in an innovative sector with a bright future. We support companies with their product development and marketing by means of technology and services centred around 3D high-end visualisation and virtual reality. In short, we make products shine brightly.

### **We have lots for you to do:**

Visualising and measuring materials, Visual Effects and Raytracing are the topics that our research department works on. Together with the employees of this department you participate on various projects.

### **About you:**

You are looking for a six-months` internship that is great fun. Getting new things off the ground every day is right up your alley and you want to do this together with young, interesting and also exceptional people.

Moreover, you have some basic knowledge about programming and scripting languages and you are a very creative person.

**Interested in job, team and company? Then we'd love to meet you. – Please don't hesitate to send us your letter of application together with your resume. We greatly look forward to getting to know you.**
