

Technical Artist – Pasadena, L.A.

About us:

Founded in 2005 as a subsidiary of RTT AG, RTT USA Inc. has continued growing rapidly. We now have about 40 highly motivated employees in our Pasadena office enjoying the day-to-day challenge of developing powerful images, movies and realtime applications for customers such as General Motors, Lexus and Toyota. In addition to the headquarters in Munich we have offices in Paris, Milan, Tokyo, Seoul and Detroit. And we're not going to stop there. After all, we are in an innovative sector with a bright future. We support companies with their product development and marketing by means of technology and services centred around 3D high-end visualisation and virtual reality. In short, we make products shine brightly, be it for design or marketing purposes or both.

We have lots for you to do:

You will be working together with colleagues in our office in Pasadena. Your task is to program plugins, to write scripts and to create shaders. You examine the way that artists and animators work and look for ways to help them save time. By scripting and plugin programming you create tools that speed up and facilitate the daily work of artists and animators.

About you:

You are looking for a job that is great fun and that combines your artistic skills with your technical abilities. Getting new things off the ground every day is right up your alley and you want to do this together with young, interesting and also exceptional people.

Together with your strong artistic skills you bring along deep insight into realtime shader programming (CgFX/ GLSL/ HLSL) as well as in offline shader programming (e.g. mental ray). You should be comfortable with programming/scripting languages such as C++, Java, Tcl/Tk, and a good know how in both Flash and realtime rendering (OpenGL, DirectX) would equally be helpful.

Interested in the job, team and company? Then we want to meet you. – Please do not hesitate to send us an e-mail with your resume together with a link to your online portfolio.
